

Infrastructure Funding Statement

1) Introduction

The Infrastructure Funding Statement (IFS) is an annual report, which provides a summary of all financial and non-financial developer contributions relating to the Community Infrastructure Levy (CIL) and Section 106 Legal Agreements (S106) within the Borough of Epsom & Ewell for a given financial year. In addition data on s278 agreements is included. This report relates to the 2019/20 financial year.

The IFS also includes a statement of infrastructure projects or types of infrastructure that the Council intends will be, or may be, wholly or partly funded by CIL.

Section 2 identifies the types of developer contributions covered by this statement, while sections 3, 4 and 5 sets out the progress in the collection and spending of developer contributions over the last financial year (2019/20).

Section 6 contains the Infrastructure List.

In addition to this statement, the Council's developer contributions data has been published on the website in the suggested government data format. The Council will update this data at least annually.

2) Developer Contributions

Community Infrastructure Levy (CIL)

Unlike S106 obligations, CIL is intended to fund more generalised, strategic infrastructure requirements across the District in order to support new development. It is a mechanism to secure financial contributions from certain developments to help fund the provision, improvement, replacement, operation or maintenance of infrastructure to support the development of the area.

CIL rates must be set out via a published charging schedule and the Council's charging schedule was adopted in April 2014. Further information can be found on the [Council's CIL webpage](#).

As per the CIL Regulations and Guidance, CIL is proportioned and allocated using the following approach:

- 80%, known as the Strategic Allocation, is retained by the Council to allocate to projects in accordance with the CIL Regulations and Infrastructure List (as set out in Section 6 of this document)
- 15%, known as the Neighbourhood Allocation, is retained by the Council to allocate to projects identified by local community groups or Councillors.
- 5% is retained by the Council to cover administrative costs.

Section 106 Planning Obligations

Planning Obligations (also known as S106 Agreements) are legal agreements which can be attached to a planning permission to mitigate the impact of development.

Obligations can only be sought where they meet the following criteria: are directly related to the development, fairly and reasonably related in scale and kind to the development, and necessary to make the development acceptable in planning terms.

S106 contributions can either be provided on-site, for example through the provision of affordable housing, or off-site for example affordable units provided on an alternative site, or in the form of financial payments.

Section 278 Highway Agreements

Additional legal agreements that can fund infrastructure are Section 278 Agreements (S278). These are legally binding agreements made under the Highways Act 1990 between Local Highway Authorities and developers. S278 agreements are required to secure the alterations or improvements to the highway.

3) Community Infrastructure Levy (CIL)

The following table provides an overview of CIL monies for the period April 2014 (when the Council began charging CIL) until the end of March 2020 (the end of the most recent reporting year). This information is provided in addition to that required by the regulations.

5) Section 278 Highway Agreements

The information provided below follows the structure as set out in the regulations (Regulation 121A, schedule 2, paragraph 4). All data, unless specified otherwise, relates to the 2019/20 financial year.

(A) Summary details of any funding or provision of infrastructure which is to be provided through a highway agreement under section 278 of the Highways Act 1980 which was entered into during the reported year.

The Council only entered into one section 278 agreement for the reported year. This related to the provision of 'Proposed new vehicular crossover to provide access into the area of land permitted under 18/00927/FUL for an extension to the Cemetery at Downs Road, Epsom.'

(B) Summary details of any funding or provision of infrastructure under a highway agreement, which was provided during the reported year.

As per the S278 agreement under (A), a new vehicle crossover has been completed to provide access to the Cemetery extension at Downs Road, Epsom.

6) The Infrastructure List

The Council is currently working on the production of its new Local Plan and intends that the strategic 80% CIL allocation will help fund the infrastructure that is needed to support the growth that will be identified within the plan.

To date, the focus has been on identifying the types of infrastructure which will require investment to support a broad level of growth (a housing need target of 579 per annum). A Local Plan Regulation 18 consultation is being prepared and this, along with ongoing engagement with infrastructure providers, will help identify the specific schemes or types of infrastructure which will be needed. Currently, the broad infrastructure types/schemes are identified in the Council's Infrastructure Delivery Plan (IDP), which was most recently published in October 2018. The IDP is considered to be a 'live' document, which will be updated as the infrastructure needs are refined throughout the plan making process. As such, the published version should be viewed as a 'snapshot' in time. Following the Regulation 18 consultation, it is intended that an updated version of the IDP will be published. The IDP will be used to help guide funding decisions relating to the strategic 80% CIL allocation.

Therefore, at this stage in the development of the Local Plan, a list of infrastructure types are identified in this Infrastructure Funding Statement, which will comprise the 'Infrastructure List'. Specific schemes will be included in future versions of the IFS as they are identified in the IDP and are considered appropriate for potentially receiving CIL funding. It should be noted that the inclusion of an infrastructure type on the list does in no way guarantee that an infrastructure type will receive CIL funding.

The Council's Infrastructure List is set on the following page. This comprises the types of infrastructure to be funded in whole or in part by CIL.

Infrastructure List

Transport improvements – excepting site specific matters needed to make a development proposal acceptable in planning terms. These site specific matters can include but are not limited to highway crossovers to access the site and local road junctions, deceleration and turning lanes, measures to facilitate pedestrian and cyclist access, and lighting and street furniture. This may also include additional mitigation measures remote from the development site where the need for such work is identified and supported in a Transport Impact Assessment.

Green Infrastructure - including but not limited to improvements and provision of public open space (including buildings and facilities ancillary to that open space use); allotments; tree, hedgerow and other landscape planting; biodiversity enhancements; and flood risk mitigations measures – excepting site specific matters needed to make a development proposal acceptable in planning terms. These site specific matters can include but are not limited to site specific landscaping, flood mitigation/ SuDS, sustainable design features such as green/ brown roofs, and site specific biodiversity enhancements such as bird/ bat bricks.

Public realm improvements (including but not limited to Town and Local Centre improvements)

Community facilities (community centres and meeting places but excluding places of worship; voluntary sector meeting places and privately operated cultural facilities)

Leisure facilities

Education facilities

Library services

Healthcare facilities
